## NEW: DR-G1100 and DR-G1130

New to Canon's product lineup are the **DR-G1100** and **DR-G1130** scanners which are ideal for processing large amounts of documents in mission-critical, centralized production scanning environments. Both have been developed to withstand the rigors of production-level scanning, while maintaining high-speed, high-quality imaging. These scanners will help companies improve productivity, maintain business continuity and increase efficiencies.

Canon delivers the kind of high performance features that make converting paper documents easier...such as high-speed color capability and even flexible configurations options.
